

LIQUID/SOLID SEPARATION SYSTEMS

SCREENING, GRAVITY, FLOTATION, DEWATERING & ACCESSORIES

AuquiChem

Advanced Chemical Treatment

Process and Wastewater Solutions

PEWE offers effective chemical solutions to address three key wastewater treatment needs. Our products provide aid to liquid/solid separation, feed bacteria health and growth as well as maximize the correct bacterial colonies.

These products are available in both liquid and dry powder formulas. Liquids have the advantage of easy dispensing while dry powders minimize transportation costs, a particular benefit for heavy use applications.

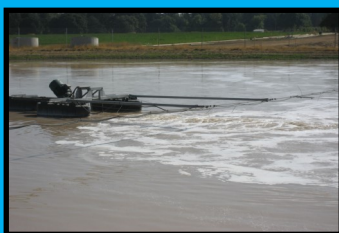

***“Three Key
Wastewater Treatment
Needs Fulfilled”***

AuquiFloc

Coagulants and Flocculent Polymers - for Filter Press, Dissolved Air Flotation DAF and Settling Clarifier systems

AuquiNu

Aerobic and Anoxic Nutrients - with organic carbon, nitrogen and phosphorous sources.

AuquiBio

Biological Augmentation - enzymes and bacteria for MBBR, MBR, activated sludge and lagoons.
