C-PAC!

Cloud Monitor & Reporting

Details-

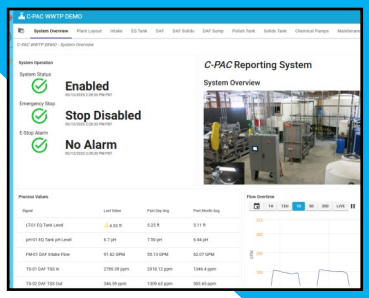
C-PAC is a Client facing cloud based monitoring system. Management asked what was possible to help maintain effective treatment results and ***C-PAC*** is PEWE's solution to that request. And we think management is going to like it.

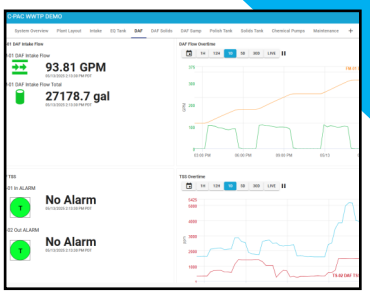
PEWE has data access and increased functionality. PEWE Technical Services are now provided through ***C-PAC*** remotely as well. The technology that allows for continuous monitoring and reporting grants PEWE repair and update privileges.

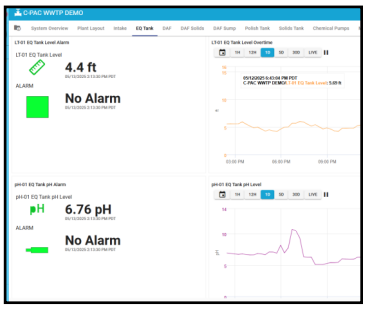
In sum, ***C-PAC*** and PEWE Technical Services are a combined cloud gateway and active in-field team dedicated to improved operations. No worries on being a test site, the system has been running over half a decade since start-up, with significant use. Fine-tuning fin multiple plant locations brings the Client a complete product solution

It's time for *YOUR* rollout!

Looking forward to a new way of achieving results.







Secure & Reliable

C-PAC! Customization

- Remote monitoring and reporting dashboard
- Trending, alarm configuration, service call tree
- Application customization and expansion
- Daily, weekly, monthly performance reporting
- Via secure VPN technology
- Configured secure login 3rd party cloud server
- Process dashboards for PLC/HMI based Client systems
- Cellular 4G Network wireless capable
- Customer based Ethernet network connectivity
- Complete printable reports and graphs

Setup-

The initial PEWE Tech Services setup optimizes existing Client resources. Note ***C-PAC*** may be expanded easily & incrementally when additional Client device monitors as required. A list of Client authorized users are then contacted via email by a ***C-PAC*** automated link. The Client's administrators role would be to monitor activity, manage users and controlling access.
