

PolyAccu Dose® System Dry Polymer Feeder

PolyAccu Dose® DP-100 Dry Feeder

PEWE Repeatability Accuracy

The PEWE PolyAccu Dose® DP and DL Systems are designed for efficient dry chemical make down for water and wastewater treatment. The key to solution generation is the application of the correct mixing energy and time in the proper amount of water, every time. By getting these three factors right with features such as the Active Blend Blade™ flash mixer, the PolyAccu Dose® System assures reliable chemical dosing.

It is through consistent results chemical use is kept to the effective minimum. Built with sturdy stainless steel and polypropylene the system will withstand years of use in harsh working environments. Completing the unit is the PEWE Command Control™ panel. The automation provides precise dry feed to the wetting and dosing pump while keeping the drawn emulsion mixed and in suspension.

PEWE Proportional Feed

The PEWE PolyAccu Dose® System is designed for proportional chemical feed based on input from your flow monitoring system. Dosing pumps readily accept 4-20ma control signals.

Compact Self-contained Skid

The PolyAccu Dose® DP and DL Systems are manufactured as a stainless steel skid mounted system for compact and easy installation.

7 Reasons PolyAccu Dose® is Best

- ◆ Effective Powder Blending
- ◆ Positive Auger Feed System
- ◆ Widest Feed Range Possible
- ◆ Stainless Steel Frame
- ◆ Chemical Corrosion Free Decking
- ◆ Manual & Automatic Feed Models
- ◆ Easy Care and Maintenance

PolyAccu Dose® Dry System

MODEL	USE	FLOWRATE
Polymer:		(GPH)
DP-100	Dry Polymer	100
DP-200	Dry Polymer	200
DP-300	Dry Polymer	300
DL-100	D.Poly/L.Coag	100/0.5
DL-200	D.Poly/L.Coag	200/1.0
DL-300	D.Poly/L.Coag	300/2.0

Other capacities and configurations available.
All models capacity designed @ 70F.

PEWE Dosing Products

PEWE manufactures a multitude of chemical dosing products. Model sizes are based on desired liquid and dry feed rates, viscosity and temperature. Dosing systems are available for pH control, nutrient feed requirements, odor control, and wastewater coagulants, flocculants or other admixtures.

The PEWE Positive Prime Feed System™ is also available as a stand-alone liquid unit for upgrading your existing chemical dosing system. Spend lower maintenance time with.....

**NO MORE PRIMING ISSUES WHILE KEEPING
YOUR CHEMISTRY PRE-MIXED.**
