

PolyAccu Dose® System Liquid Chemical Feed Stations

PolyAccu Dose® Duo Model LD-10D

PEWE Repeatable Accuracy

The PEWE *PolyAccu Dose*® System is designed for efficient liquid chemical make down for water and wastewater treatment. The key to solution generation is the application of the correct mixing energy and time in the proper amount of water, every time. By getting these three factors right with features such as the *Active Blend Blade*™ flash mixer, the *PolyAccu Dose*® System assures reliable chemical dosing.

It is through consistent results chemical use is kept to the effective minimum. Built with sturdy stainless steel and polypropylene the system will withstand years of use in harsh working environments. Completing the unit is the PEWE *Positive Prime Feed System*™. This unique design provides positive liquid feed to the dosing pump while keeping the drawn emulsion mixed and in suspension.

PEWE Proportional Feed

The PEWE *PolyAccu Dose*® System is designed for proportional chemical feed based on input from your flow monitoring systems. Dosing pumps can accept 4-20ma control signals.

7 Reasons *PolyAccu Dose*® is

- ◆ Effective Liquid Blending
- ◆ *Positive Prime Feed System*™
- ◆ Widest Feed Range Possible
- ◆ Stainless Steel Frame
- ◆ Polypropylene Support Panels
- ◆ Manual & Automatic Feed Models
- ◆ Easy Care and Maintenance

PolyAccu Dose® System

MODEL	USE	FLOWRATE
Polymer:		(GPM)
LD-10F	Single Polymer	0.5 to 2.0
LD-10C	Single Coagulant	0.5 to 2.0
LD-10D	Dual Poly/Coag	0.5 to 2.0
RGT-20/40F	Single Polymer	3.0 to 5.0
RGT-20/40D	Dual Poly/Coag	3.0 to 5.0
pH Control:		(GPH)
PDP-10A/C	Acid or Caustic	4.5
PDP-20A/C	Acid or Caustic	8.0
PDP-40A/C	Acid or Caustic	20.0
Nutrient:		(GPH)
PAN-10S	Single Feed	1.0
PAN-10D	Duo Feed	1.0/1.0
PAN-20S	Single Feed	2.0
PAN-20D	Duo Feed	2.0/2.0

Other capacities and configurations available.
All models capacity designed @ 70F.

PEWE Dosing Products

PEWE manufactures a multitude of chemical dosing products. Model sizes are based on desired liquid feed rates, viscosity and temperature. Dosing systems are available for pH control, nutrient feed requirements, odor control, and wastewater coagulants, flocculants or other admixtures.

The PEWE *Positive Prime Feed System*™ is also available as a stand-alone unit for upgrading your existing chemical dosing system. Spend lower maintenance time with.....

NO MORE PRIMING ISSUES WHILE KEEPING YOUR CHEMISTRY PRE-MIXED.
